香港中文大學（深圳）理工學院
School of Science and Engineering
The Chinese University of Hong Kong, Shenzhen

Name:

Student ID:

Welcome to the School of Science and Engineering (SSE)!

To begin, three important “Self” advices from School Dean may help you live a prolific life for four years at SSE:

01

Self-Learning Skills

Study after class to enhance the learning experience on YOUR OWN. With self-learning skills, you will be able to comfortably weather the changes in response to the scientific and technological advances driven by the knowledge we have already learned.

02

Self-Discipline Attitude

Learn to stop doing inefficient things, spend adequate time studying and completing your homework. Self-Discipline also leads to healthy lifestyle, that you will enjoy a wonderful campus experience throughout the years.

03

Self-Development Spirit

Develop into a multi-talented student, maximize your talents and define your own destiny to grow into a well-rounded person and become a prolific contributor to society and a model citizen.

To enhance your academic experience and improve your competitiveness in the furious job market, your Career Passport will guide you in developing these competencies and lead to career success by graduation. Here Career covers both further study and start working immediately after graduation. Further study is also a way to shape your career.

Do remember to check off the Passport agenda and review your progress timely!

FIRST YEAR

Immerse yourself into campus life, discover your interest and build up your skills

Fall Term (Sep – Dec)

- Get yourself familiar with a wide range of campus resources
- Explore your academic interest, discuss your academic plan with your academic advisor
- Get involved in student associations or interest clubs based on your interest
- Apply for internship program to expand your network

Spring Term (Jan – May)*

- Register for CET-4 and CET-6, or any other standardized tests (e.g. NCRE)
- Participate in major-related information sessions, deepen your understanding of each major
- Search information regarding summer exchange program, summer course and volunteer offering
- Narrow your academic preference, then clarify your major declaration
- Establish your LinkedIn Profile, make an appointment with career consultant if needed

Summer (Jun – Aug)

- Participate in summer exchange program, take summer course on campus or volunteer service

**Term 2, Year 1 is known to be an important and decisive term for SSE students. Not only of a heavy credit load, there are new course experience like Programming and Statistics. Don't be left behind.*
